SUBJECT: COMISA IN THE NETHERLANDS

Dear Sirs,

In 1969 I established COMISA S.p.A. with the main activity in the brass moulding and production of taps.

Nowadays, we moved our specialisation in the production of: press and screw fittings for multilayer pipes, multilayer pipe, underfloor radiation heating and cooling systems, manifolds, compression fittings for copper pipes, plumbing fittings, gas fittings, valves for copper pipes and taps, solar energy systems.

Our production is 100% made in Italy and our company has been registered from CSQ to ISO 9001:2008 since 1994, for the quality assurance system and our products are approved by the most important standard certification authority systems: Kiwa/Gastec, Dvgw, Wras, Argb, Skz.

We export more than 70% of our production in more than 35 Countries worldwide and the Dutch market has always been an interesting market for us, but we have never entered in the way we were hoping to.

With the cooperation of Jos Okkerman we have now found a reliable partner that will put, together with us, as much effort as possible to promote and sell our brand in the country.

For any need of Comisa products we suggest that you get in touch with Jos Okkerman.

Best regards.

COMISA S.P.A./ Federico De Lisi

Managing Director
